Inferencing

Learning Goal: We are learning to go beyond the literal meaning of a text and form ideas about aspects of the text that are not explicitly stated – that is, make inferences on the basis of what they read “between the lines”

Success Criteria:

➢ I will understand what a prediction is

➢ I will understand what an inference is

➢ I will ask questions to better understand the text.
  o I will make inferences to answer questions when I can.

➢ I will use ideas and clues from the text to make my inference.

➢ To support my inference, I will:
  o use evidence from the text
  o use my prior knowledge and experience
  o use text-to-text and text-to-world connections

➢ I will provide details when supporting my inference
